The increases in gross written premiums for the second quarter and first half of 2025, when compared to the same 2024 periods, were driven by double-digit premium growth from the agriculture and credit (re)insurance, specialty programs, accident & health and captives divisions. The increases in gross written premiums were partially offset by decreases in the global property and construction & energy solutions divisions.

The non-cat loss and LAE ratios for the second quarter and first half of 2025 improved 0.7 points and 0.5 points, respectively, when compared to the same 2024 periods, primarily driven by the business mix shift.

The expense ratios for the second quarter and first half of 2025 improved 0.9 points and 0.7 points, respectively, when compared to the same 2024 periods due to earnings leverage partially offset by higher acquisition costs due to the business mix shift.

Net investment income for the second quarter and first half of 2025 decreased \$3.4 million and \$2.4 million, respectively when compared to the same 2024 periods. The decreases were primarily driven by losses from our alternative & strategic investments portfolio due to the decline in the fair value of limited partnership investments. Partially offsetting the decreases were increases in income from our fixed income portfolio due to a higher yield and larger asset base.

#### Stockholders' Equity

Stockholders' equity was \$899.9 million at June 30, 2025 which represented an increase of 5.8% when compared to stockholders' equity of \$850.7 million at March 31, 2025. The increase in stockholders' equity was primarily due to an increase in the market value of our investment portfolio and net income.

**Adjusted operating income** – We define adjusted operating income as net income excluding the impact of certain items that may not be indicative of underlying business trends, operating results, or future outlook, net of tax impact. We use adjusted operating income as an internal performance measure in the management of our operations because we believe it gives our management and other users of our financial information useful insight into our results of operations and our underlying business performance. Adjusted operating income should not be viewed as a substitute for net income calculated in accordance with GAAP, and other companies may define adjusted operating income differently.
